

GOPAL KABRA

Data Analyst | SQL, Python, Power BI, Qlik | Ex-Capgemini, Louis Vuitton | MSc Polimi
gopalkabra03@gmail.com | [linkedin.com/in/gopal-kabra](https://www.linkedin.com/in/gopal-kabra) | +39 327 963 9622 | [gopal-kabra.github.io](https://github.com/gopal-kabra) | Milan, Italy
Italian Job-Seeker Permit holder. Available immediately.

Data Analyst with 3 years across luxury retail, strategy consulting, and BFSI. Builds SQL and Python pipelines feeding Power BI and Qlik dashboards, with hands-on ML clustering, forecasting, and A/B testing. Cut weekly reporting prep at Louis Vuitton by 80%, reduced merchandising variance by 22%, and shipped the analytics that supported 100% APAC revenue growth on a Capgemini BFSI engagement.

EDUCATION

Master of Science in Management Engineering Sep 2023 – Mar 2026
Politecnico di Milano (Polimi), Milan, Italy
Thesis: k-medoids clustering on intergenerational behavioural data (Longevity Economy).

Bachelor of Technology in Computer Engineering Aug 2017 – Apr 2021
Pimpri Chinchwad College of Engineering, Pune, India

WORK EXPERIENCE

Louis Vuitton Milan, Italy
Merchandising Data Analyst Intern Jun 2025 – Dec 2025

- Cut weekly report prep time by 80% by building a Power BI suite that pulled from Qlik Sense, SQL, and store inputs to track €15M monthly sell-in and sell-out across 25 stores and 120 SKUs.
- Reduced overstock and understock variance by 22% by running ABC, seasonal demand, and sell-through analysis across 6 categories and writing a rebalancing recommendation the planning team adopted.
- Validated demand assumptions for the quarterly inventory decision by designing A/B tests on two merchandise planning scenarios, with results presented to the planning director.

CESI Milan, Italy
Business Strategy & Data Analyst Intern Feb 2025 – Jun 2025

- Ranked 6 markets by risk-adjusted ROI on a €15B TAM by building three-scenario simulation models in Python and Excel that quantified €1.5B revenue potential and drove the final go/no-go recommendation.
- Surfaced 2 high-risk markets by running sensitivity analysis across 4 scenarios where IRR turned negative under moderate stress; findings changed the final market ranking.
- Cut stakeholder alignment cycles by 30% by cleaning and consolidating 15 regulatory, competitive, and financial data sources in Python and Excel into a single analytical framework with documented refresh logic.

Capgemini Pune, India
Associate Consultant (Promoted from Senior Analyst in 14 months) Aug 2021 – Aug 2023

- Built a Python and SQL analytics pipeline that supported 100% APAC revenue growth on a BFSI engagement across 5 segments, shipping weekly performance dashboards to commercial leadership.
- Cut data prep time by 45% and served 60 end users by replacing a manual monthly reporting cycle with a scheduled ETL pipeline and a star-schema Power BI semantic model with DAX and row-level security.
- Identified an 18% cost-reduction opportunity through SQL and Excel spend analysis, presenting findings directly to client stakeholders.

PROJECTS

Predictive Maintenance for Railways | Industry 4.0 Winner, 1st of 40 international teams

- Won 1st place against 40 international teams by building a cost-benefit model that demonstrated 42% downtime reduction and 18% maintenance savings on 3 years of simulated data.

Customer Segmentation & CRM Analytics

- Ran RFM clustering and cohort analysis in Python and Pandas on 50,000 records, flagged 3 high-value at-risk cohorts, and supported a 20% churn reduction and 25% lift in 6-month retention.

SKILLS

Data & Querying: SQL, window functions, CTEs, query optimisation, Python, Pandas, NumPy, R, ETL, ELT, data pipelines, data cleaning, data governance

Statistics & ML: Linear regression, logistic regression, forecasting, ARIMA, clustering, K-means, k-medoids, RFM, classification, Random Forest, A/B testing, hypothesis testing, feature engineering

Visualisation & BI: Power BI, DAX, data modelling, row-level security, Qlik Sense, Tableau, dashboard design, KPI reporting, data storytelling

Data Engineering: dbt, Snowflake, BigQuery, AWS S3, Redshift, Athena, Airflow, Git

Business & Tools: Advanced Excel, Power Query, PivotTables, variance analysis, scenario simulation, financial modelling, stakeholder management, Agile, technical documentation

CERTIFICATIONS & ADDITIONAL

Certifications: IBM Data Analyst Professional | Microsoft Power BI PL-300 prep | AWS Developer Associate

Awards: Winner, Industry 4.0 International Competition | Capgemini Excellence Award

Languages: English C1 | Italian A2 (actively studying for B1) | Hindi and Marathi Native
